Re: COVID-19 Positive Individual

We received word another individual tested positive for COVID-19 within the Timbercrest community. Therefore, Timbercrest must make the following changes within the community for the level of activity permitted.

- Communal dining may continue; however, residents will need to keep a safe distance of 6 feet while dining, which means residents will be seated one person to a table (couples may continue to dine together).
- Indoor visitation is suspended until further notice.
- Outdoor visitation and Virtual Visits may continue but with limited availability. Visit the Timbercrest website on the COVID-19 Information page to schedule an appointment. For special needs, please contact us at visits@timbercrest.org.
- Trips off campus are not permitted at this time, unless it is for a medical appointment. Residents or their family may provide transportation to the medical appointment. If you have a medical appointment, ***please contact your medical provider*** to inform them of the possible exposure before you keep your appointment.
- Group activities are suspended at this time.
- Neighborhood Home residents who volunteer in the Manor (Neighborhood Market, resident transportation, and Chapel as needed) may continue to provide those volunteer services. COVID testing based on the staff testing schedule is required.

While we had hoped that we would not see COVID-19 cases again within our community, it is not surprising with the increased positivity rate in Wabash County and surrounding communities. This is a challenging time for everyone in our community. Be assured that Timbercrest is following the guidelines given to us by the State and Federal regulatory agencies, the Indiana State Department of Health and Centers for Medicare and Medicaid, respectively.

If you have any questions or concerns, please let us know. We want to make sure you are well informed and assured of the actions being taken to keep our community well.
