RE: Return to Communal Activities and Visits

We are glad to report that we are able to reopen our community to indoor visits, group activities, leaves from campus, and social dining effective today. Please be patient as we work hard to make this adjustment for you as quickly as possible.

Please note, we will report today two new COVID-19 cases, but the circumstances surrounding those infections do NOT require Timbercrest to extend the outbreak period.

As COVID-19 and its variants continue to be a concern in and around our community, we will remain diligent in our infection control efforts and continue to monitor the infection rates in our area. Due to the higher rates since early July, the Indiana Department of Health requires facemasks to be worn while indoors at this time regardless of vaccination status. Residents and their visitors should wear facemasks while visiting indoors. If visiting outdoors, it is recommended to wear facemasks as well for the extra measure of protection.

We are a community together, and together we will work to keep our community well. Thank you for your continued support and understanding of the many changes that happen, sometimes on a daily basis.

Timbercrest...making good things happen...together. ©
