RE: COVID-19 Update

A new case of COVID was identified in the Timbercrest community. This necessitates testing of all Manor residents (Health Care, Crestwood, and Residential) and employees. Manor residents will be tested today and all employees will be tested tomorrow.

During this time, it is necessary for us to put the following precautions in place.

- Indoor visits are suspended. Outdoor visits at designated visiting areas are encouraged and should be scheduled online through Timbercrest's COVID-19 Information page. For visitation questions, please contact visits@timbercrest.org.
- Group activities are suspended. Individual activities are encouraged.
- Leaves from campus, except for medical appointments, should not occur. Families may continue to take residents to medical appointments but should follow the principles of infection control – wearing face masks over nose and mouth, perform good hand hygiene, and social distance as possible.

Once testing is complete, we will provide another update.

If you have any concerns about the infection control measures taken here at Timbercrest, please contact me or Sabine Thomas.
