Re: Announcement – COVID-19 Status Update

We are pleased to announce, following a couple of weeks without any new COVID illnesses, Timbercrest is able to discontinue the routine testing of residents and employees effective immediately.

It also means residents are again able to take meals and attend activities in other care areas.

Timbercrest will continue to require residents and visitors to wear facemasks while in common areas and hallways. Visitors are encouraged to wear a facemask throughout the visit. Employees will continue to wear facemasks based on their vaccination status for COVID and flu (an N-95 if unvaccinated for one or both).
